Submit

THANK YOU PAGE

Upon submitting the complaint or service request, the patient will be redirected to a thank-you page and will receive an SMS acknowledgement.

Tips to patient coordinators

1

Study and understand the list of inpatient concerns and the respective categories.

2

Use the complaint management tool effectively during your daily inpatient rounds.

3

During your first visit to an admitted inpatient, educate the patient on how to use the QR code to register their concerns during their stay.

4

Understand the patient concern in detail and register them under respective category. Describe the concern in detail.

5

During every patient round, inform the facility of registering the patient concerns.

6

Ensure even minor complaints and requests raised by the patients are registered online.

7

Once the patient concern is registered, inform the patient that the respective team will address the concern.

8

Occasionally, make sure all the patient concerns are effectively addressed by the department in charges respectively.
